Healthcare career planning checklist

Separate education, professional registration and immigration questions before committing to a course.

01 Define the role and location

- ☐ Write the occupation and province you want to explore, and why.
- ☐ Summarize your existing education, registration and work background.

02 Ask the education provider

- ☐ Check current entry requirements, course content, duration and total costs.
- ☐ Ask what the qualification prepares you for and what it does not provide.

03 Ask the professional regulator

- ☐ Identify the regulator for the intended occupation and province.
- ☐ Ask how existing qualifications are assessed and what further steps may be required.

04 Discuss immigration separately

- ☐ Prepare your status, key dates and questions about the proposed study or work plan.
- ☐ Keep a separate question list for the school, regulator and immigration consultant.

Admission, professional registration and immigration authorization are separate decisions. This checklist does not establish eligibility for a licence, permit or permanent residence. Check current information with the responsible institution or regulator.
